The time of the workshop and the length of the workshop was appropriate for my schedule.

39 responses

The materials provided were useful.

39 responses

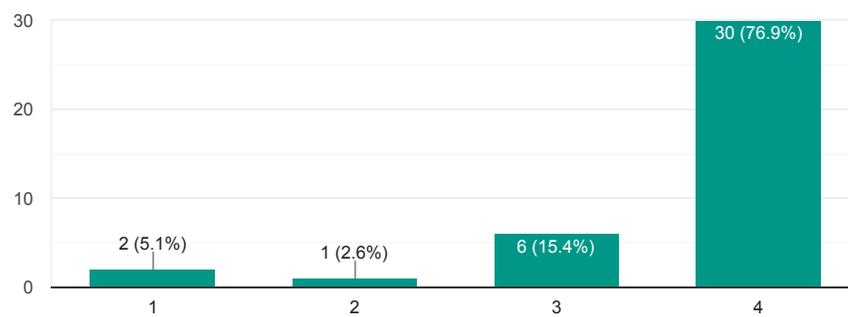

Overall, I am satisfied with the workshop.

39 responses

How likely are you to attend other workshops?

39 responses

What did you find to be most helpful?

20 responses

I especially like that it was held in the gym. So much better than the cafeteria. Better organization and better circulation of people with being able to space them out, which was also the result of organizing the starting points by the house system - great idea!! Also like it that the students get to earn extra points by attending and I love it that my child's teacher required them to stay a minimum amount of time in order to earn the credit. By the time she had spent that much time there, she was engaged and motivated to want to go to every station before she left.

interactive games and simulations

The teachers and other instructors were very knowledgeable.

The instructors were very good describing each experiment

There was not really anything most helpful. It was a cool science like fair with some interesting demonstrations.

Whatever my kids liked

### Your suggestions of topics for future workshops:

16 responses

small scale trebuchets (marshmallows); minute-to-win-it with creations

Anatomy, maybe testing reflexes(sitting and hitting the knee area to make a kicking motion)

I would like to see some exhibits that showcase American ingenuity. Maybe something that uses a chemical reaction to turn into a mechanical source of energy. I know these kids are young but maybe a fun lesson in thermal dynamics? Something they could all interact with.

Yes if y'all do this next year I would suggest getting people who know how to deal with children. This year a lady that was working one of the booths put her hands on my little 4 year old son. All he wanted to do was play like the other children. She was very rude and disrespectful. And I suggest if y'all are going to make it a family event that you need things for the whole family. If I would have knew what it was gonna be like my children and I would have stayed home.

More science

I thought steam night was wonderful, really enjoyed it

Lots of fun! Will definitely come back again.

N/A

I enjoyed steam night a lot it was fun, thank you [ my son]

gr

Good job

My daughter and I had the most wonderful time and are excited to enjoy this event every year!

I know there is no way to work with everyone's schedule, however most parents get off work at 5 starting a workshop at 5 makes it difficult for working parents.
